Use of Time

Comments:

Old info, need an updated program.

Not good use of time.

Made me feel comfortable.

Great speaker/teacher. Keeps his audience involved by doing fun (not cheesy) activities - great topic to learn more about.

The charisma of the consultant helped me stay engaged.

Some good nuggets, but jumped around a lot.

Filled out before lunch

Comments:

SWOT is too basic, DiSC been done multiple times, not nearly enough on execution - almost none.

Awesome course!

I'm a sponsor so my objectives would naturally be different.

Really cemented my need to improve

Content that helps brainstorming first half of the day was the best

What could be improved?

More time

More time.

The presentation was pretty scattered. Only part of the focus was on execution.

Overall program, I was disappointed. Repetitive form business planning retreat.

I was very happy with this group. The only thing that would have made it better for me would be time to put some of this in place while we have the directional support.

More time

More pages in binder for topic.

Less material and more focus on a few things. (deeper dive)

It was a good refresher on info. I've heard in the past. Perhaps some fresh information could be added, but overall great presentation.

More time for groups, more in-depth exercises.

Slide organization to the handout. Lots of skipping around. Great content!

There wasn't enough time to cover all of the information completely.

Not enough time for this class.

N/A

More time

More time to cover all material.

Almost too much for 1 day. Better focus and more depth on slightly fewer topics.

Marginal presenter, good topic, visuals were dated and not very polished. Very causal presentation.

Need more time!

Tons of great info. Only suggestion is to clarify objectives. Learning targets for each segment.

Course outline in the beginning.

Not enough time.

I would recommend considering how portions of the presentation might negatively affect or impact female participants "comments & content".
